

Garden Party Camp 2026

Project 2: Garden Bunny

Pastel Paper with Colored Pencils & Chalk Pastels

1. Have students choose their **pastel paper** color and write their names on the back.

2. Using a pencil, guide students step-by-step through the drawing of the project.

3. Once the drawing is complete, have students trace over all pencil lines with a **thin black Sharpie**.

   They should also fill in any areas that are meant to be solid black.

4. Use **colored pencils** to guide students through coloring the bunny, duck, and mushrooms.

5. Switch to **chalk pastels** and guide students through the coloring grass, bushes, and sky.

   Encourage students to color lightly, to achieve the “airy” look!

6. Once finished, spray projects with hairspray to seal the chalk! Apply about 3 coats of hairspray to the front and back of projects. Allow hairspray to dry in between coats!
